Project Name	Project – Smart Fashion Recommender Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	A customer is a user who needs an intermediary recommender to solve their problem in online order through smart recommender web application .
2.	Idea / Solution description	When the user faces any problem during online order this web application will recommend the alternative solution to solve their problem at any time.
3.	Novelty / Uniqueness	The user can order their interested product that we recommended on the home page using the filters they provide.
4.	Social Impact / Customer Satisfaction	Customer can get their interested product by the recommendation system .
5.	Business Model (Revenue Model)	We can charge a certain amount as commission to the seller for helping them recommend their products and we can also setup a donation to maintain web app alive.
6.	Scalability of the Solution	This web app can maintain many users and assign a recommended product .
